

# Hydra® Full-Force Keyboard for Gamers

Redefine keyboard interactions by combining precise force-sensing technology with immersive haptic feedback unlocking new levels of performance, personalization and connectivity for every user.

With Hydra® Full-Force Keyboard, elevate your playing skill from quick, hard key presses to more precise, fidelity-driven experiences by adjusting the force intensity for a more elegant gameplay style with personalized settings.

## What

- New layer of skill and fidelity combining reaction time with intensity of applied force
- An intuitive force-enabled keyboard that captures the advanced functions of a PC-based gaming keyboard with the simplicity of a game controller
- Rapid Trigger: instant adjustment of shooting style with no need to lift a finger
- High Resolution Control: complete incremental control of an input that proportionally adjusts with the amount of force applied
- Dynamic Macros: integrates multiple functions into one key that are force activated

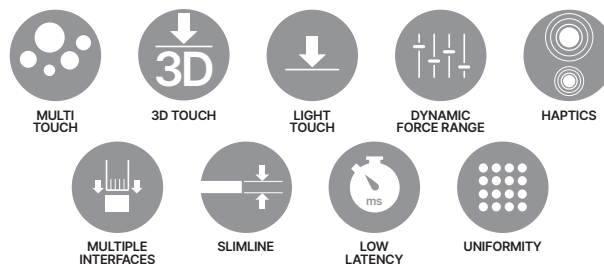

## How

- Hydra® Full-Force Keyboard captures the incremental intensity and depth of a key press to provide enhanced fidelity
- Deep presses utilized for intuitive game play – walk to run to jump
- Every key is fully adjustable with the option to add force based key macros, activate high resolution control, and set dynamic rapid trigger to any function in a game

- Fast, consistent response
  - Up to 1000 Hz polling rate
  - 100% N-key roll-over with anti-ghosting
  - Key actuation: from 35g (customizable per product)
- Keyboard LED design tools for quick visual reference

## Benefits

- With Hydra® Full-Force Keyboard, elevate your playing skill from quick, hard key presses to more precise, fidelity-driven experiences by adjusting the force intensity for a more elegant gameplay style
- Get more value from high-end gaming PCs and peripherals with the latest game titles
- Complex key combinations and controls simplified so that gamers can focus on being fully immersed in the game
- Achieve a new level of skill and personalization
